

Cereal-free feeding rations

Good doer (600 kg)
light work

Feed	Amount
1,5 kg hay / 100 kg bodyweight	9,0 kg
Faser-Light	1,2 kg (31,2 g starch; 70,8 g sugar)

Important:

- The hay should be from the late cut if possible, as it contains fewer carbohydrates.
- This ration is sufficiently vitaminized and mineralized, an additional addition of mineral feed is not necessary.

Variations:

- Without training or on reduction diet **800 g of Faser-Light** per day are sufficient (20,8 g starch; 47 g sugar).
- If more work is done, add **50 ml Lein-Distel-Öl**. If the energy supplied is no longer sufficient, switch to an additional **1,5 kg of Vito**.
- For muscle growth and maintenance, **100 g of Amino-Muskel PLUS** can be added to cover protein requirements (amino acids). The small amount of starch (14 g starch; 8 g sugar) contained in this product is negligible related to the whole ration.

Horse with normal feeding behaviour (600 kg)

Feed	Amount
1,5 kg hay / 100 kg bodyweight	9,0 kg
Vito	1-1,5 kg (35-52,5 g starch; 39-58,5 g sugar)

Important:

- The hay should be from the late cut if possible, as it contains fewer carbohydrates.
- This ration is sufficiently vitaminized and mineralized, an additional addition of mineral feed is not necessary.

Variations:

- If more work is done, add **50 ml Lein-Distel-Öl**.
- For muscle growth and maintenance, **100 g of Amino-Muskel PLUS** can be added to cover protein requirements (amino acids). The small amount of starch (14 g starch; 8 g sugar) contained in this product is negligible related to the whole ration.

Bad doer, fussy horse (600 kg)

Feed	Amount
2 kg hay / 100 kg bodyweight	12 kg
Vito	2-3 kg (70-105 g starch; 78-117 g sugar)
Bergwiesen-Mash	additionally 500 g (dry weight) every 2 nd day (23,5 g starch; 26 g sugar)

Important: This ration is sufficiently vitaminized and mineralized, an additional addition of mineral feed is not necessary.

Variations:

- If more work is done, add **50-100 ml Lein-Distel-Öl**.
- For muscle growth and maintenance, **100 g of Amino-Muskel PLUS** can be added to cover protein requirements (amino acids). The small amount of starch (14 g starch; 8 g sugar) contained in this product is negligible related to the whole ration.

Senior horse (600 kg)

Depending on the amount of work and the type of horse (good doer or fussy) one of the rations described above.

Tips for senior horses:

- In any case, it is recommended to add **100 g of Amino-Muskel PLUS** in order to maintain the muscles as well as possible.
- Furthermore, we recommend feeding **Bergwiesen-Mash 2 to 3 times a week** in order to support digestion (achieved e. g. by brewer's yeast and the linseed contained in this product).

Reduction diet (600 kg)

Either:

Feed	Amount
1,5 kg hay / 100 kg bodyweight	9,0 kg
Faser-Light	0,4 kg (70-105 g starch; 78-117 g sugar)
Force	40,0 g (0,28 g starch; 2 g sugar)

Or:

Feed	Amount
1,5 kg hay / 100 kg bodyweight	9,0 kg
Wiesen-Chips	0,5 kg (7,5 g starch; 19,5 g fructanes)
Force	80,0 g (5,6 g starch; 4 g sugar)

Important: The hay should be from the late cut if possible, as it contains fewer carbohydrates.
